

The **CompEx Competency Framework (CCF)** is a structured framework designed to guide individuals through the progressive development of knowledge, skills, and behaviours required to work safely and effectively in hazardous areas or explosive atmospheres. Throughout your journey, we encourage you to undertake regular learning and development to maintain skills and knowledge.

Ex Awareness

Introductory knowledge of hazardous areas and associated risks which is vital to all roles and activities when working in areas or locations with explosive atmospheres.

Core Competency Practitioner

Development of core knowledge and practical skills required to work in hazardous areas.

Application Design Engineer

Expertise in designing systems and solutions for hazardous areas, integrating safety principles into engineering design.

Foundation

Basic theoretical understanding of area classification, protection concepts, equipment labelling, and safe working practices.

Responsible Person

Oversight and responsibility for hazardous area operations, ensuring compliance and safety.

Re-certification

CompEx qualifications require re-certification every five years to stay valid.
